

Orbis

Data Privacy Policy

Category	Privacy
Policy Owner	Legal & Information Security
Effective Date	January 1, 2026
Next Review Date	January 1, 2028
Applies To	All employees who access, store, or process personal data at Orbis

1. Purpose and Scope

This Policy sets out how Orbis collects, uses, stores, and protects the personal data of employees, customers, and business partners. It applies to all employees, contractors, and systems that process personal data on Orbis's behalf, including the Orbis HR Co-pilot and any AI-assisted tools.

2. Categories of Employee Personal Data

- **Identity data:** name, employee ID, date of birth, government ID numbers.
- **Contact data:** personal email, phone number, address.
- **Employment data:** role, department, manager, date of joining, performance ratings, appraisal dates.
- **Compensation data:** salary, benefits, reimbursements.
- **Leave and attendance data:** leave balances, leave history, work hours.
- **Sensitive data:** health information (e.g. medical certificates for sick leave), disability status, POSH complaint records.

3. Principles of Data Processing

- **Purpose limitation:** personal data is collected only for legitimate HR, payroll, compliance, or business purposes and is not used for unrelated purposes without consent.
- **Data minimization:** only data necessary for the stated purpose is collected or retained.
- **Access control on a need-to-know basis:** employees may access only their own HR records; managers may access their direct reports' role-relevant data; HR Administrators may access organization-wide data strictly for HR administration.
- **Accuracy:** Orbis takes reasonable steps to keep personal data accurate and up to date.

- **Storage limitation:** personal data is retained only as long as necessary for the purpose collected or as required by law.

4. Employee Data Access Rights

Employees have the right to access their own personal data held by Orbis, request correction of inaccurate data, and request an explanation of how their data is used, including by any AI-based tool such as the Orbis HR Co-pilot. Requests should be directed to privacy@orbis.com.

5. Use of AI Tools and Automated Processing

Where Orbis uses AI-assisted tools to answer employee questions about personal HR data (for example, leave balances or appraisal dates), the following safeguards apply:

- Employees may only retrieve their own personal data through such tools; cross-employee data access is restricted to authorized HR Administrators.
- Every AI-generated answer that references personal or policy data must be traceable to its source (database field or policy document section).
- AI tools must not fabricate leave balances, dates, or policy terms; where the underlying data is unavailable, the tool must state that the information could not be verified rather than guess.
- All queries made through AI tools, including which records were accessed, are logged for audit purposes as described in Section 7.

6. Data Security

Personal data is stored on Orbis-managed infrastructure with access controls, encryption in transit, and role-based permissions. On-premise AI tools that process HR data must not transmit raw personal data to external third-party services without prior approval from Information Security.

7. Audit and Logging

Access to personal data — including queries made through HR systems and AI co-pilots — is logged. Audit logs record who accessed what data, when, and through which system, and are retained for 3 years for compliance purposes. Logs are reviewed periodically by the Compliance team.

8. Data Sharing with Third Parties

Personal data is shared with third parties (e.g. insurance providers, payroll processors) only under a signed data-processing agreement that requires equivalent protection standards. Data is not sold or shared for marketing purposes.

9. Data Breach Notification

Any suspected or confirmed breach of personal data must be reported immediately to infosec@orbis.com. Orbis will assess, contain, and notify affected individuals and regulators as required by applicable law.

10. Retention and Deletion

Employee personal data is retained for the duration of employment plus 7 years thereafter, in line with statutory record-keeping requirements, after which it is securely deleted or anonymized.

11. Consequences of Non-Compliance

Any employee found to have accessed, shared, or misused personal data in violation of this Policy is subject to disciplinary action up to and including termination of employment, and may face civil or criminal liability under applicable data protection law.

12. Review

This Policy is reviewed annually by the Legal and Information Security teams and updated to reflect changes in applicable data protection law.
